TITLE : TOILET PAPER

ABSTRACT : PROBLEM TO BE SOLVED: To use a toilet paper without folding when it is used and to improve workability by laminating a plurality of sheets of paper and forming an adhesion part prepd. by bonding the papers at every specified interval and forming cutting lines.

SOLUTION: A toilet paper is wound into a roll-like shape and has an axial hole in its center and is set on a shaft of a fixing tool attached on the wall face of a toilet. In addition, in this toilet paper, a plurality of sheets of papers 1a, 1b... are laminated and adhesion parts 2, 2... are formed at every specified interval. In addition, a cutting line 3 is formed in the intermediate of the adhesion part 2 and this cutting line 3 is to be easily cut by forming a machined dots and is not restricted to the machined dots. It is possible thereby to cut simply a required length and after cutting, it can be used without folding as it is.
